Source: New Jersey Department of Education.
 Note: Special education students taught in self-contained classrooms are reported in the "Special Education" category, while "mainstreamed" special education students are reported at their grade level.
 Figures that aren't whole numbers are because of "shared-time" students, who either split their time between two different schools, or attend school half of the day.
 Ungraded means the children are served in an educational unit that has no separate grades.

 MOE--margin of error. Data are based on a sample and are subject to sampling variability. A margin of error is a measure of an estimate's variability.
 The larger the margin of error in relation to the size of the estimates, the less reliable the estimate.
 When added to and subtracted from the estimate, the margin of error forms the 90 percent confidence interval.
